New 340B claims identification and submission requirements

02.24.2021

Effective March 1, 2021, Express Scripts will require a new identification method for submitting and identifying 340B eligible claims.

When pharmacies determine post-adjudication that a previously submitted claim is 340B eligible, pharmacies are required to submit an N1 transaction with the proper Submission Clarification Code (Field 420-DK) of 20, and Software Vendor/Certificate ID (Field 110-AK) of 340B. The details of this specific requirement can be found in Section 2.5 of the Network Provider Manual.

A new payer sheet (340B-N1) is available on the Pharmacist Resource Center to support this process.

If you need a member's specific prescription processing information or other help with a claim, please visit our Pharmacist Resource Center at <https://prc.express-scripts.com> [prc.express-scripts.com].

Thank you,
