Provider Relief Fund Overview & Previous Distributions

In 2020, the CARES Act and the Paycheck Protection Program and Health Care Enhancement Act, and the Coronavirus Response and Relief Supplemental Appropriations Act provided \$178 billion in relief funds to health care providers, including those on the front lines of the coronavirus response. In addition to this funding for the PRF, the American Rescue Plan Act signed in 2021 provided \$8.5 billion for rural providers and suppliers.

Phases 1 & 2 General Distribution

- Payments to Medicare, Medicaid, or CHIP, Dental, Assisted Living Facilities and other providers based on 2% of patient revenue, regardless of the provider's payer mix

Targeted Distributions

- Allocated to providers based on particular criteria: hospitals in High Impact Areas, rural providers, skilled nursing facilities, tribal hospitals and clinics, children's hospitals, nursing homes, and safety net hospitals

Phase 3 General Distribution

To broad range of providers, payments were the greater of:

- 88% of operating losses and increased expenses in the first half of 2020
- 2% of annual patient care revenues

How Are ARP Rural Payments Calculated?

- ARP Rural payments will be based on the number and type of Medicare, Medicaid, and CHIP claims for beneficiaries living in a rural area between Jan. 1, 2019 and Sept. 30, 2020.
 - HRSA will use HHS's Federal Office of Rural Health Policy definition of rural. *More info available at: hsa.gov/rural-health/about-us/definition/index.html*
- Eligible providers do not have to be located in a rural area to get a payment.
 - HRSA will calculate payments based on CMS claims for **beneficiaries** living in rural areas.
- HRSA will price Medicaid and CHIP claims data at Medicare rates, with some limited exceptions for some services provided predominantly in Medicaid and CHIP.

How Are ARP Rural Payments Calculated?

- HRSA will calculate payments at the billing TIN level for those included in the application.
- HRSA requires that ARP Rural payments are allocated to the billing TINs.
- Eligible billing TINs that have at least one Medicare, Medicaid, or CHIP claim for a rural beneficiary will receive a minimum payment TBD based on applications.
- HRSA will make payments using Medicare, Medicaid, and CHIP claims data already available to us.
 - You do not need to verify whether your patients live in a rural area.
 - You must indicate your interest and include a full list of billing TINs in the application portal that you would like HRSA to review.

How Are Phase 4 Payments Calculated?

Base Payments

- ~75% of the Phase 4 allocation will be used for base payments calculated on providers' changes in operating revenues and expenses from July 1, 2020 to March 31, 2021.
 - Large providers (based on annual patient care revenue) will receive a payment amount that is X% of their changes in operating revenues and expenses.
 - Medium and small providers will receive X% of their changes in operating revenues and expenses plus a supplement, with small providers receiving the highest supplement.
 - HRSA will determine the exact percentage for the payments and supplements after analyzing data from all the applications received to ensure we remain within our budget and funds are distributed equitably.
- No provider will receive a Phase 4 base payment that exceeds 100% of their losses and expenses from July 1, 2020 to March 31, 2021.
